93% of all breaches or incidents involve...

WeBCAM BLACKMAIL/SEXTORTION - Click Here
Hacker 101: Build Trust

- Spear phishers personalize emails to try to gain your trust
  - Full name
  - Mailing address
  - Name of your employer
  - Personal Data (SSN, Banking Account Number, etc)

*Even if the email or text message appears to be from someone you know, use caution.

Approach

The Double Barrel attack uses multiple emails to create a believable narrative.

Stage One: The Lure

1st Email builds trust

Hey Jack,
I'm about to jump on a flight. Just to let you know I'll be sending you a file when I land or get wifi.

-Lena

Stage Two: The Phish

The second email contains malicious attachments or links

From: Lena.Dobbs@example.com
To: jack.doe@example.com
Subject: Re: Request

Jack,

Thank you for your patience. Attached is the file I need you to review.

Thanks for your help.
-Lena

How to Spot a Phish

1. Recognize the red flags:
   - Suspicious emails
   - Missing personalization
   - Suspicious links

2. Beware of urgent messages:
   - Urgency to act now
   - Firewalls and anti-virus software

3. Check the links and attachments:
   - Hover over links to see the actual destination
   - Don't click on suspicious links

4. Verify the sender:
   - Is the sender known to you?
   - Is the sender's information consistent?

5. Report to the appropriate authority:
   - Notify your IT department
   - Report the incident to your organization's cybersecurity team

PayPal Phishing Example

Your Transaction Has Been Declined

Dear Customer:

We are happy to inform you that your PayPal account has been limited because recently reduced a pattern of activity in other accounts with high risk in order to verify unusual login or activity with your account. Please do not send any personal information such as your account number, username, or password. For more information, please visit PayPal and see the terms listed.

Remove Your Limitation

Thank you for your understanding and cooperation. If you need further assistance, please contact Customer Service to set up an account.

PayPal
Voice Phishing Example

What Is It?

• Ransomware is a type of malware that attempts to extort money from a computer user by infecting or taking control of the victim’s computer, or files, or documents stored on it.

• Ransomware will either lock or prevent normal usage, or encrypt the documents and files on it to prevent access to the saved data.

Your Backups Aren’t Enough

Stage 1. Phishing attempt or brute force attack is successful & a dropper virus is released (Emotet, Trickbot, etc)

Stage 2. Credential harvesting tool deploys and gathers credentials across your network (including your backups potentially)

Stage 3. Ransomware is the big red flag alerting you that you have been hacked
Business Email Compromise Scams

- Use email to solicit wire transfers
- Impersonate executives or vendors/suppliers
- Resemble spear phishing
- Targets financial officers

What Does it Look Like?

Type #1: CEO Fraud

- Impersonates an executive
- Hacked or spoofed email address
- Exploits authority

Sample CEO Fraud

Subject: Please get back to me on this

Do you have a moment? I am tied up in a meeting and there is something i need you to take care of.
We have a pending invoice from our Vendor. I have asked them to email me a copy of the invoice and i will appreciate it if you can handle it before the close of banking transactions for today.
I cant take calls now so an email will be fine.

Sent from my iPhone

Type #2: Bogus Invoice Schemes

- Impersonate trusted vendor or supplier
- Use fake invoices
- Point you to new location for wire transfer

Bogus Invoices

Good Day,
Please kindly review the attached invoice for your approval.

Best Regards,
Brandon Wood

App State fleeced for almost $2 million by scam; feds get most of the money back

- In 2016, Appalachian State hired Charlotte-based Rodgers Construction to build its new health science college facility. That October, the company filed a form with the school to establish wire transfers and direct deposits.

- Two months later, a staff member in the App State’s controller’s office received an email purported to be from Doug McDowell, the controller for Rodgers Construction.

- The email included a new direct deposit form along with instructions that the school should reroute company payments to a bank account at JPMorgan Chase. About a week later, some $1.96 million was sent to the new location.

- On Dec. 20, the real Doug McDowell contacted App State to ask why the company had not received its money.

Avoiding BEC Scams

- Always check the sender and verify it is legitimate
- Check reply-to addresses as well
- Check links before clicking

Random Bait to Chew On

1. Top phishing disguises:
